Developing Innovative, Modern and Hands-on Digital Teaching Materials with a Focus on Robotics, Cloud and IoT for VET

The Project

The (R-IoT-C)4VET partnership goal is to identify digital gaps in Robotics, IoT and Cloud Computing for VET and to develop teaching materials with an assessment system to improve this situation through interdisciplinary training and guidance.

[Visit our website!](#)

Partners

HROBOS (Croatian Robotic Association (Croatia)

Paydas (Turkey)

Lithuania Innovation Center (Lithuania)

Colegiul Tehnic de Transporturi Transilvania (Romania)

Uninettuno (Italy)

EVM (Spain)

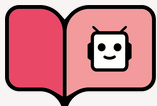

Activities

1- Needs analysis

Each partner is developing a National needs of analysis to determine what are the next steps to be taken and the future in Robotics, IoT and Cloud Computing

2- E-Teaching materials

Theory and hands-on activities developed together by all the partners, focused on vocational training (VET)

Robotics

Internet of Things

Cloud Computing

3- Implementation

All the materials will be Pilot Tested by 70 students and 10 teachers to ensure the quality of the material and ensure that all the quality indicators are being reached

Latest news

The partners attended the Transnational Project Meeting in Samobor (Croatia) on April 12th-13th. In this meeting the partners discussed the next steps for the project and had the opportunity to finally meet one another face to face.

As a part of the cultural exchange, the partners also had the opportunity to visit an Iron and Copper mine.

The partners also had the opportunity to visit the elementary school where Mate Rimac studied. The 33-year-old Bosnian-Croatian who founded Rimac Automobili in 2009 and who now finds himself leading the new Bugatti-Rimac joint venture along with Porsche. The partners had the pleasure of meeting his mentor, Ivan Vlainic, who encouraged him to become who he is nowadays.
